

# DiagWin

**PC Management at your finger tips**

Diagwin Professional suite consists of the following:

- PC Inventory
- Reporting
- Desktop Management
- Application Deployment
- Manage Computers / Groups
- Enterprise System Information
- Task Scheduler
- Remote PC Management
- Comprehensive Reports

### Inventory Collection

- Hardware details
- Software information
- Network setup
- License compliance
- Security parameters

DiagWin Professional® allows System Administrators to gather the hardware, software, network and security information of all Windows based PCs and servers in a network in a short time. The product is built on a robust RDBMS engine and provides significant advantage to administrators and managers in handling IT operations.

DiagWin is easy to install and can be set up in a matter of minutes. All windows based PCs, Laptops and servers can be identified automatically from the network. With a few mouse clicks the client software can be installed on each PC from the server. DiagWin utilizes proven client/server methodology and the data transfer occurs through secure encrypted TCP/IP packets.

### OS Independent Inventory Tool

Diagwin collects Hardware, Software inventory and Security information from workstations and servers with Win 9x/ME/NT/2000/XP operating system. The information gathered is extensive and is carried out in few seconds. The user has the option of viewing selected groups of information.

### License Compliance

Organizations have several challenges in keeping track of software license usage and ensuring compliance. DiagWin collects license information as part of its PC inventory collection process and can provide useful reports on the distribution of licenses, usage etc. Software Metering ensures the license compliance and aids in recovering costs from unused licenses. Exception reports quickly highlight areas of concern and help to reduce countless number of hours spent on ensuring License compliance. In these days of corporate resizing, DiagWin helps effectively manage the use of software licenses across the organization and saves significantly through software license optimization.

### Remote PC Management

Industry analysts say that a systems administrator typically spends 35% of his / her time in mundane tasks like walking around the buildings, floors and hallways to support PC users. Diagwin provides remote PC management functions that can perform a variety of tasks including shutdown, logoff, reboot and setting screen savers. Disk clean-up of a user system such as emptying recycle bin, cookie removal, deleting temporary files, and removing internet files.

### Computers and Groups

With Diagwin you can do 'Many tasks at a time' without compromising on Quality and Performance. It clusters the systems based on their domains and workgroups, but allows the administrator to seamlessly perform custom grouping.

### Security

It is the duty of every organization to facilitate an environment that is secure from hackers and intruders. The first step is to understand the current configuration of security parameters on an enterprise wide basis. Diagwin provides information about password policy, open network shares, user accounts, ports and services thereby allowing informed decisions on network security.

### Benefits

- Enterprise-wide Inventory
- Centralized database
- Quick & Easy Deployment
- Thin-Client architecture
- Built-in reporting
- License Information
- PC Security Metrics

**Microsoft**  
GOLD CERTIFIED  
Partner

## Comprehensive Reporting

DiagWin is packaged with a Crystal Reports® component and provides state-of-the-art reporting addressing customer needs. Users can easily add new reports without any kind of programming changes. BOSS personnel are ready to assist with report customization to meet specific client requirements and deliver them on time and within budget.

### Server - Min. Requirements

- Processor - Pentium III or higher
- Memory - 256 MB RAM
- Hard drive - 10 MB
- Operating System - Win2K SP3
- Database - MS-SQL

### See for yourself

Visit: [www.boss-uwin.com](http://www.boss-uwin.com) to inventory your own PC on a stand-alone basis. Take control of your IT assets in minutes!

### Client - Min. Requirements

- Processor - 486 or higher
- Memory - 16 MB RAM
- Hard drive - 500 KB

### Applications Deployment

DiagWin Application Deployment allows IT administrators to mass-deploy Software applications as well as patches, hot-fixes, and upgrades of applications and OS throughout your enterprise.

All tasks are initiated from an easy to use and familiar management console that provides desktop management, scheduling and standardization tools. Deployment helps reduce the costs associated with the distribution and management of desktops, laptops, and servers, by providing on-going deployment for both new and legacy systems in mixed hardware and OS environments.

The Gartner Group estimated in January, 2000 that an organization with 2500 computers can reduce costs by 55% or \$103,000 per year by using deployment tools. DiagWin Deployment is for IT professionals who need to deploy frequent updates, fixes, patches, and applications on several computers across a network on demand or on a scheduled basis. Deployment appeals to organizations who:

- Plan a large-scale deployment
- Have periodic software deployment needs
- Need to deploy to remote offices and/or mobile workers
- Need to reconfigure labs or classrooms
- Have invested in a remote management solution such as SMS, but who require features not available in their current solution
- Develop and sell software to end users

DiagWin Deployment speeds up technology transitions and reduces end user downtime by ensuring that their computers contain the latest software. It also allows IT professionals to manage new and legacy computers after hours without having to visit each computer. DiagWin provides integration into a scalable architecture to provide deployment support enterprise-wide from a central location.

### Additional Features

- Remote Deployment
- Built in Scheduler
- Supports Installshield, MSI, WISE packages
- Install as User/Administrator
- Supports Industry standard Scripting Tools
